1961 11 15 10:30
Münster -

Observation of a community

at 10:30 - Slight wind from N. Baffled
as is, "windbreak" house W. wall
in distance has wind at 10:30

10/30 10/30 83.83 m/s

W. gully, mountain stream, unseeded

8/21, date 16.10.61

from 1959: W. baffle, sandy bottom

as in debris bank above

one of, mudbank, the following are found in mud

debris

as follows, number followed as the date of collection

found in debris bank as W.G. Ballot sample

Le Goulet Münster

as seen while in the valley (100-600 m)
Evident influence of the river on the same ground
action of the mountain bank allows a few
as a result of the action 1959, (1) undrained, the
as a result of the drainage (and better
product of the soil until 1956-1957-1958 -
as was seen in the mountain old rubble continues to
the mountain as a result of the removal of the soil
as seen in 1959, an important point here
as seen in the old mudbank about the river

undrained as shown in addition

drainage are numerous mountainous, as the undrained
area, undrained as a little 1956, a short
area, undrained as a dry area, example, from

W. is seen below the bedrock, which is on

W. gully, undrained

? number of gullies on the ground.
